

Statement on the Revision of the Final Report on the Evaluation of the
Institute of Physics of the CAS by commission 03 – *Physical Sciences*.

We would like to reiterate once again that the assessment of the committee and its findings are of great value for the Institute as it brings an outside view. The findings on program orientation, age structure of the teams and student schooling are valuable for our planning. All these findings will be thoroughly discussed by Director's Board and Institute Board and subsequently projected into the future research work of the Institute of Physics of the CAS.

As our comments on the original Final Report have been properly taken into consideration *we agree with the Revision of the Final Report* on the Evaluation of the Institute of Physics of the CAS by commission 03 – Physical Sciences and *we do not have any further comments*.
